Earthquakes

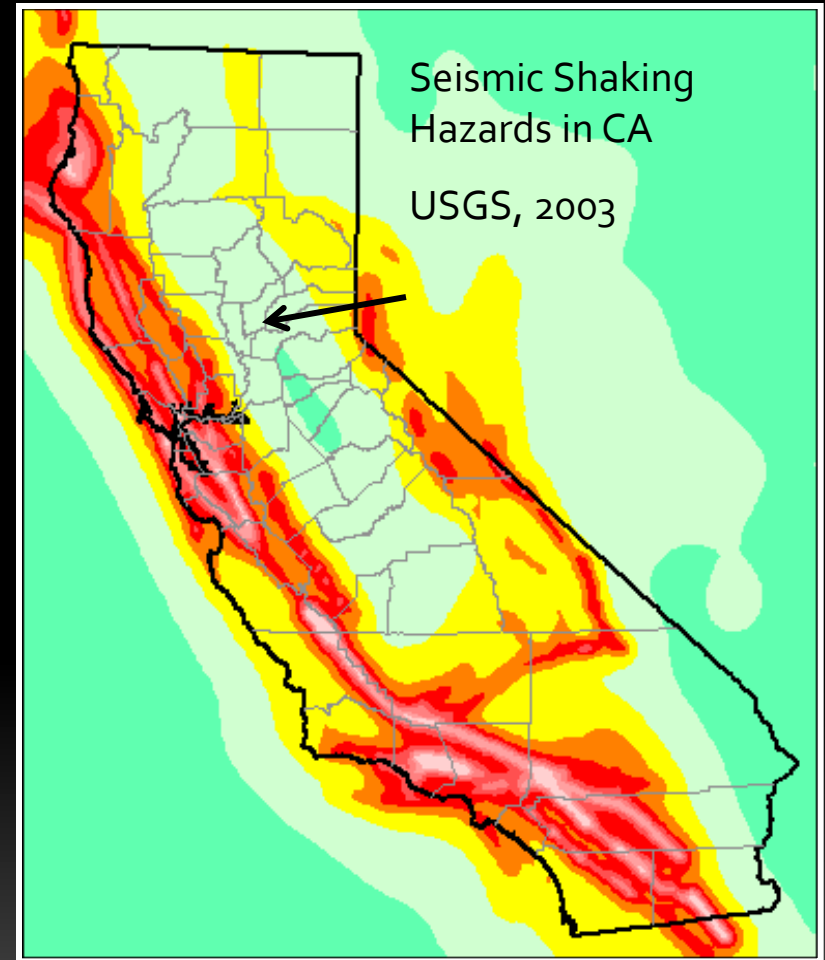

Ref: OES/FEMA

- Earthquakes occur when the two sides of a fault slip suddenly against each other
- Actions in case of earthquake:

Car: stop/stay inside, avoid bridges & trees

Indoors: get under sturdy furniture or doorway

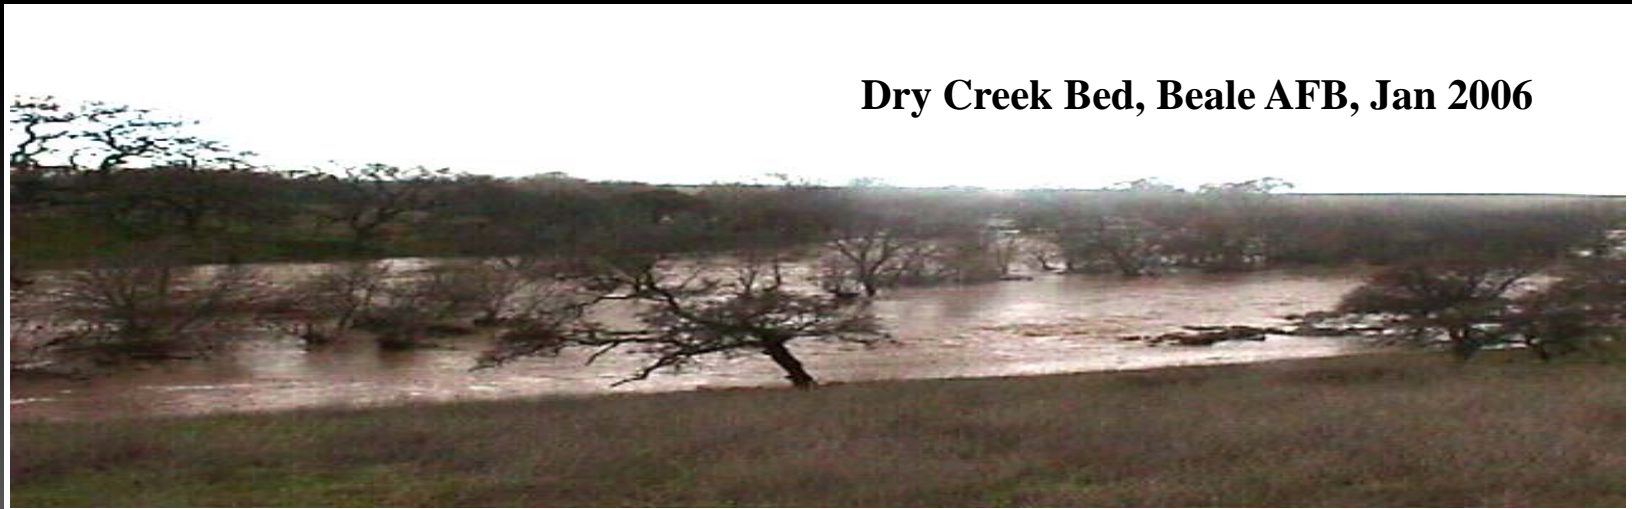

Outside: avoid using flame producing devices after earthquakes because gas lines will have likely busted

Weather Watch vs. Warning

REF: FEMA

- There are two weather public announcements:
 - Watch: conditions indicate the possibility of a given hazard developing
 - Warning: issued when a given hazard exists
- When these announcements are made, follow instructions given to you or begin executing your emergency plan

Dry Creek Bed, Beale AFB, Jan 2006

Major Accidents

Ref: CEMP 10-2

- Any accident which presents a grave risk of injury or death to the public and involves extensive property or environmental damages.
- It may involve aircraft, vehicles, facilities or HAZMAT

Hazardous Materials (HAZMAT)

Ref: AFI 10-2502

- Hazardous materials are substances that can hurt you or damage the environment
- Be familiar with the HAZMAT in your work area and know where MSDS's are kept in case of emergency
- In case of a HAZMAT spill, distance yourself and call 911 or Fire Emergency Services at ext 4-8675

Hazardous Materials: Shelter-In-Place

Ref: Handbook AFEM Are You Ready?, AFPAM 10-100

- Shelter-In-Place (SIP) is a short-term, practical solution to protect you following HazMat incidents.
- SIP is most effective when occupants pre-plan and practice contingency actions based on location of hazard and population.

Outside Hazard/ Inside Population

- Turn off the HVAC, fans, and other air intakes.
- Go to the interior area designated as SIP location.
- Limit use of mobile communication devices.
- Listen to first responders for more information and instructions.

Hazardous Materials: Shelter-In-Place

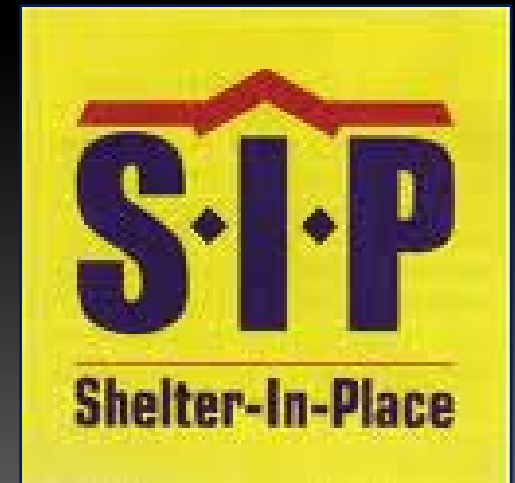

Ref: Handbook AFEM Are You Ready? and AFPAM 10-100

Outside Hazard/Outside Population

- Sound alarm (notify others in immediate vicinity).
 - Don protective equipment.
- Seek nearest building or safe area (upwind or crosswind from incident site)
 - Report the event.

Inside Hazard/Inside Population

- Turn off HVAC, exhaust fan(s) and combustible heaters
- Report the event
- Close and seal doors and windows
- If instructed, evacuate upwind or crosswind
- Notify Unit Control Center (UCC)

Terrorist Activities

Ref: AFMAN 10-2602

- Terrorist activities revolve around asymmetrical warfare focusing on large scale local, national and international targets
- Terrorist may chose to attack with conventional weapons or with WMD (weapons of mass destruction) to include CBRN (chemical, biological, radiological or nuclear) weapons

Active Shooter

Ref: 9 SFS Installation Lockdown Procedures Guide

- Active Shooter is defined as “...an armed person who has used deadly physical force on other persons and continues to do so while having unrestricted access to additional victims”
- There are specific and uniquely different actions to follow when notified of an active shooter on base:
 - Lockdown: for active shooter within same building as you or in the immediate area
 - Shelter-In-Place: your building/facility is near the building with an active shooter incident

Active Shooter

Ref: 9 SFS Installation Lockdown Procedures Guide

Lockdown Procedures

- ▣ If indoors, enter the nearest room, lock, and barricade door
- ▣ Get down and seek cover away from windows and doors
- ▣ Turn off all lights
- ▣ Barricade/cover doors and windows (as appropriate) based on the threat
- ▣ Take roll/personnel accountability
- ▣ Each room should attempt to establish communication with UCC via landline, cell phone, or radio
- ▣ Maintain condition until the order is rescinded or revised by a recognized authority
- ▣ If attacker successfully gains entry, personnel in that room evacuate immediately (if possible) by any means and by any force
- ▣ If outdoors, report to your squadron's pre-determined staging area

Active Shooter

Ref: 9 SFS Installation Lockdown Procedures Guide

Shelter-In-Place Procedures

- Bring all personnel inside
- Close and lock all building entrance/exit doors
- Close and lock all exterior windows
- Abandon all rooms with exterior walls
- Assemble all building occupants in interior rooms & hallways
- Take roll/personnel accountability
- Maintain this condition until a recognized authority rescinds or revises the order

Emergency Preparedness

Ref: FEMA

- Preparedness encompasses planning, training and certification, exercising, and gathering disaster supplies

Planning

- Incorporate all local possible hazards (may need more than one plan)
- Plan for Worst Case Scenario
- Have relocation/evacuation plan for family members and pets
- Plan disaster supplies for 72 hours

Emergency Preparedness

Ref: FEMA

Training and Certification

- During an emergency, you may need to rely on previous military training (i.e. SA/BC, CPR) to help other victims or yourself
- For civilians, local training (i.e. First Aid, CPR) can be obtained through your local American Red Cross

Validation

- Exercise your plans to find areas in need of improvement regarding planning or training
- Exercise your fire evacuation plan twice a year
- Involve all family members

Emergency Preparedness: Supply Kit

Ref: Department of Homeland Security

- Water: one gallon of water per person per day for at least three days, for drinking and sanitation; replace after six months in disaster kit to keep supply fresh
- Food: at least a three-day supply of non-perishable food; replace if passed expiration date
- Battery-powered or hand crank radio and a NOAA Weather Radio with tone alert and extra batteries for both
- Flashlight and extra batteries
- First aid kit
- Whistle: to signal for help
- Dust mask, to help filter contaminated air and plastic sheeting and duct tape to shelter-in-place
- Moist towelettes, garbage bags and plastic ties for personal sanitation
- Wrench or pliers to turn off utilities
- Can opener for food (if kit contains canned food)
- Local maps
- Currency (cash and coins)

Notification

Ref: CEMP 10-2

- There are several methods used to notify Beale AFB personnel of disasters:
 - Broadcast information to off base personnel via Channels 5 & 35 (Comcast)
 - AtHoc (purple circle located at the bottom right hand side of tool bar)
 - Base email
 - Secondary Crash Net
 - Giant Voice/Base Siren System
 - Peacetime Emergency Warning: 3-5 minute steady tone
 - Attack Warning: 3-5 minute wavering tone

B.A.A.D.D.

Frequently Asked Questions.

0-0-1-3

Q. Can I call B.A.A.D.D. even if I wasn't the driver?

A. Yes! Things happen, and we understand that. That's why we're here.

Q. How do I call B.A.A.D.D.?

A. Add this to your cell phones right now, **(530) 634-5555**. You'll be talking to base command post. Just ask for B.A.A.D.D. and they'll connect you with the B.A.A.D.D. driver. Exchange information with the driver and they'll get you taken care of.

Q. Do I have to pay money to use B.A.A.D.D.?

A. No! Not at all! B.A.A.D.D. is a free service. However, we request that if you use the service, that you support it by attending the fund raisers and events around base!

Q. How do I become a member of B.A.A.D.D.?

A. It's easy! Just email BAADD@Beale.af.mil and ask them to add you to the BAADD volunteer list.

Overview

- Definition of OPSEC
- OPSEC Process
- Why is it important?
- Vulnerabilities
- Foreign Intelligence Threat
- Critical Information
- What You Can Do

What is OPSEC?

- Protection of UNCLASSIFIED but CRITICAL information
- Critical information is the specific facts of an activity, capability, or intention that if known to the adversary, could weaken or defeat the operation

We can't protect everything, we just want to make the enemy work as hard as we do.

OPSEC Process

Identify Critical Information

- Unit locations
- Deployment schedules

Analyze Threat

- Foreign nationals

Analyze Vulnerabilities

- Personnel
- Telephones
- Internet
- E-mail

Assess Risk

- Cost vs. Risk

Apply Countermeasures

- Most fixes are people related

Protecting Critical Information

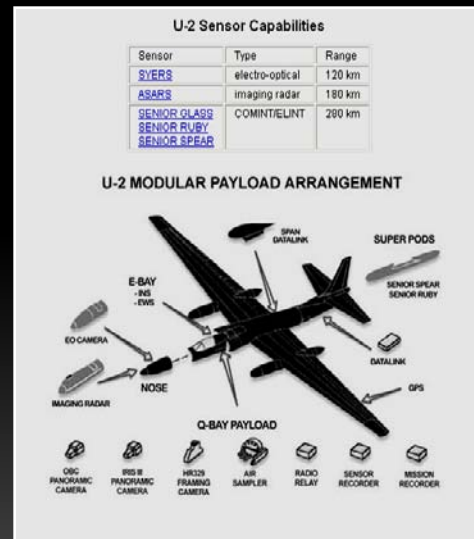

UNCLASSIFIED does not mean UNIMPORTANT

Protect the following information:

- Which units
- How many people
- What kind of equipment
- What job specialties
- Location
- Time and dates
- Any limitations
- Target areas

Why is it Important?

- Foreign intelligence services collect 80% to 95% of their information through unclassified & open sources

We can't protect everything, we just want to make the enemy work as hard as we do.

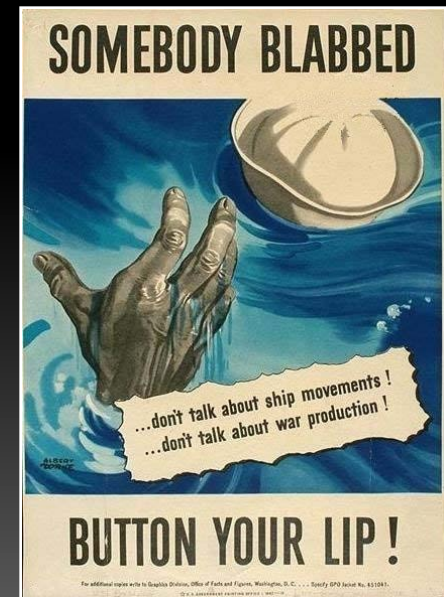

OPSEC Factoid

A USAF pilot posted critical information about a new US asset on a popular public website about military and civilian aircraft, accessible worldwide. The questions and answers posted resulted in over 700 posts, read more than 68,000 times, and over 600 websites being created about the pilot and the asset.

OPSEC Factoid

- “Sailors aboard USS Cole were shocked to find out that the personal e-mail messages they sent home to family and friends were forwarded to the media to be used as quoted material in news stories without their permission. October 12, 2000 after a routine fuel stop, a small craft approached the destroyer, an explosion occurred, killing **17 US sailors and injuring 39.**”
- 12 October 2000, Suicide bombing in Yemen

Foreign Intelligence Threat

- Over 90 countries actively collect against US
- Significant threat to Beale exist due to strategic focus
- Growing terrorist threat
- Why is the enemy watching Beale AFB?
 - U-2
 - Global Hawk
 - NAOC
 - DCGS

Foreign Intelligence Threat

Russia

- IMINT, SIGINT, HUMINT

North Korea

- Primarily focused on Americans operating in S. Korea

China

- Sends legal personnel to US, around key assets, to gather information and send back to collection agencies

Vulnerabilities

- Unclassified commonly perceived as unimportant
- Lack of threat awareness
- Convenience of information technology
- Loose talk
- Careless paper handling
- Attacks on computer systems
- Dumpster diving

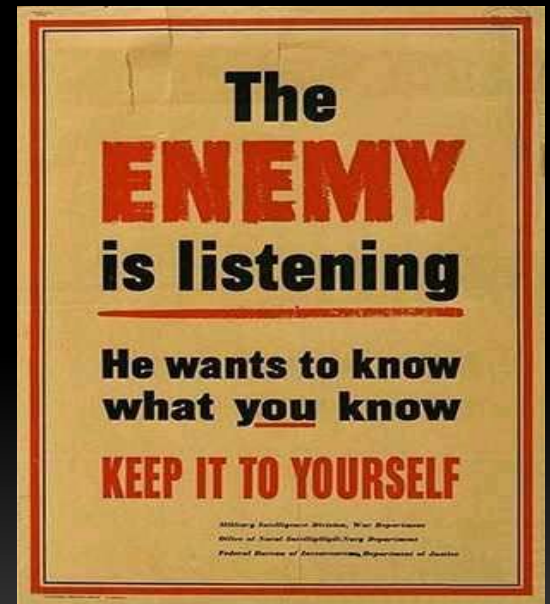

What You Can Do

- Know the threat
- Be familiar with g RW & Unit Critical Information
- STE, SIPRNET, BITS, Runners
- Shred everything practical
- Educate your families
- Use common sense

If you suspect suspicious activity report it to **OSI

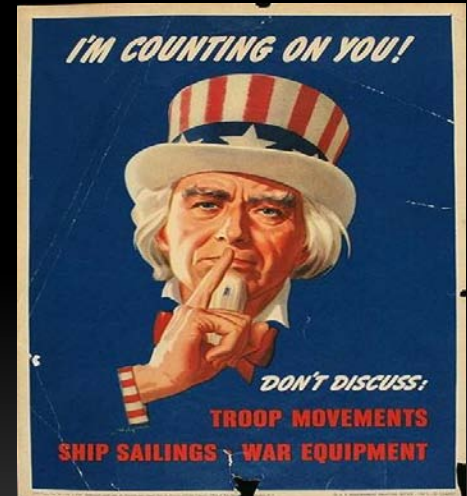

x2383

Bottom Line: The enemy is always watching; use OPSEC!

Wing Critical Information Top Ten List

1. Mission objectives
2. Operations and exercises
3. Deployment and mobilization details
4. Force readiness
5. Capabilities and limitations
6. Contingency procedures
7. Information about key personnel
